

Alu80/40
Heavy duty profiles

Dummy profile Alu80/40

- dummy profile Alu 80/40 for industrial concrete floor slabs
- ultra-stable profile head with edge protection
- alternative to joint cutting
- allows large-area concrete placement
- serves as dummy joint and reference point for final floor height

Description / Details:

Dummy profile Alu80/40, aluminum material, height 80 mm, width 40 mm. Dummy profile for all kinds of medium to heavy floor conveyor traffic. Use lean concrete to set joint rail to final height of concrete floor slab. Extension and intersection points by means of connection clips. The profile also serves as reference point for the final floor height and as bench mark for slopes.

Tender specification:

Construction of dummy joints with dummy profile Alu80/40 or equivalent. Level profile to finished surface height of concrete floor slab. Set profile system on lean concrete one day before concrete placement.

No joint sealing required. Extension and intersection points by means of connection clips.

Profile / Item no.	Profile height	Material	Element lengths	Packing units
Alu80/40	80 mm	Aluminium	2500 mm	25 RM/250 RM
